Acciaio (resistente alle alte temperature). L'acciaio non è verniciato ma naturalmente ossidato, il che vuol dire che il colore dell'articolo si modifica naturalmente a contatto con fuoco, acqua e altri agenti atmosferici creando un effetto ruggine autentico. | Steel frame (high-temperature resistant). The steel is not painted but naturally oxidized, which means that the color of the item naturally changes in contact with fire, water and other atmospheric agents, creating an authentic rust effect.
